English — Fluent C1 (EF SET)

Education

LEIC-A
Instituto Superior Técnico
Expected Graduation: 2028

profile

2nd-year Computer Science student (LEIC-A) at Instituto Superior Técnico. Focused on learning clean code, algorithms, and building practical projects. Looking for an internship or junior role where I can contribute from day one.

projects

Invoicing & Inventory CLI

Academic

Systems Programming coursework — Instituto Superior Técnico

Invoicing and stock-management system in C: catalogue, cart, invoice history sorted with a hand-written merge sort, EAN validation, and wildcard product search.

C · Merge Sort · CLI

Scrabble Game & Agent

Academic

Functional Programming coursework — Instituto Superior Técnico

Full Scrabble engine in Python for human and bot players across three difficulty levels — board/move validation, letter-bag shuffling, and a move-search agent.

Python · AI Agent

16-bit Single-Cycle Processor

Academic

Computer Architecture coursework — Instituto Superior Técnico

Designed a 16-bit single-cycle processor in Logisim, supporting a small custom instruction set (li, add, dot, dota) built on a 3-bit opcode scheme.

Logisim · ISA Design

education

LEIC-A — Computer Science and Engineering

2024 — 2028 (expected)

Instituto Superior Técnico, Lisbon

Coursework spans systems programming, computer architecture, algorithms and mathematics.
